

ILI Skype Speaking Assessment

The following oral English proficiency assessment is based on a 15-minute Skype interview. The questions included personal “warm-up” conversation prompts followed by IELTS and iBT independent speaking prompts sequenced in increasing difficulty. While such a snapshot assessment is approximate, it nonetheless provides an overall picture of a speaker’s ability to produce English in a realistic academic or professional setting.

Assessment Date: August 30, 2019

Student name	CEFR Band	Approximate IELTS correlation	Approximate iBT correlation
Wang Junfei	B2	6.5	90
